Christopher Carroll

631-521-0628 | Carroll7044@gmail.com | Boca Raton, FL 33486

EDUCATION

Florida Atlantic University, Boca Raton, FL — Graduated: May 2023

Bachelor of Science, Management Information Systems (MIS) – Cybersecurity

- Cumulative GPA: 3.55
- 5x member of the Dean's List

Florida Atlantic University, Boca Raton, FL

Master of Science, Information Technology & Management — Graduated: May 2026

- Cumulative GPA: 3.75
- 6x member of the Dean's List

CERTIFICATIONS

- CompTIA A+ Core 1 Certification Exam, CompTIA A+ Core 2 Certification Exam
- CompTIA Security+ Certification Exam
- Cisco Network Security: Secure Routing and Switching
- Microsoft Security Essentials: Professional

WORK EXPERIENCE

Dedicated IT, Palm Beach Gardens, FL

Escalation Lead Engineer — June 2025 – Present

- Escalation point for infrastructure, security, and DevOps operations across a multi-client healthcare and enterprise base, driving root-cause analysis across compute, storage, virtualization, and network layers.
- Engineered internal DevOps platforms with containerized Docker/Kubernetes workloads, infrastructure as code (Terraform, Ansible), and self-hosted AI tooling built on local LLMs, ML pipelines, and RAG.
- Built full stack applications on Next.js, React, and Node.js with PostgreSQL/MySQL backends, owning schema design, replication, backup, and performance tuning, delivered on high-availability stacks with reverse proxying, HAProxy load balancing, TLS automation, and failover across on-prem and cloud.
- Embedded DevSecOps controls in delivery pipelines (secrets management, least-privilege IAM, dependency scanning, policy-as-code) with observability through Prometheus, Grafana, synthetic monitoring, and MS Graph API alerting.
- Automated endpoint provisioning, application packaging, and configuration enforcement at fleet scale with PowerShell, Bash, Python, and RMM tooling.
- Architected enterprise networks spanning site-to-site VPN, multi-WAN failover, SD-WAN, BGP/OSPF, VLAN segmentation, HA firewall clustering, and zero-trust policy across mixed-vendor platforms.
- Engineered virtualization, storage, and backup across VMware vSphere, Hyper-V, Azure, AWS, and Google Cloud, including HA/DRS, SAN/iSCSI, GCP project provisioning and API enablement, gsutil/CLI storage operations, and datacenter operations (server provisioning, iDRAC/iLO, RAID, hardware lifecycle, power/cooling planning).
- Administered Active Directory, Entra ID, Intune, and Jamf, including replication, FSMO, DC recovery, hybrid identity sync, Conditional Access, PIM, Autopilot, and security baselines across Windows, macOS, and iOS.
- Led incident response and forensics across endpoint, identity, and web layers with detection tooling on MS Graph and EDR telemetry.

Kinetix Solutions, Coconut Creek, FL

System Engineer — April 2024 – June 2025

- Architected and deployed Azure, GCP, and AWS infrastructure, including AWS EC2, EBS, VPC networking, subnets, route tables, NAT gateways, and hybrid connectivity to on-premises environments
- Served as the top escalation point for the Professional Services team, owning root-cause analysis on complex client incidents
- Migrated and managed datacenter infrastructure for enterprise clients across Azure, Hyper-V, KVM, and VMware ESXi, including host lifecycle, virtual networking, storage, and resource optimization
- Automated provisioning, compliance, and application deployment with AWS Systems Manager, CloudFormation, Lambda, Azure Automation, Intune, and shell scripting
- Developed and tailored Next.js web applications with React, JavaScript, HTML, and CSS for client-facing and internal tooling
- Designed and enforced security policies across Azure, AWS, GCP, Intune, and legacy Active Directory domain controllers
- Owned patch management and system upgrades across cloud and on-premises environments
- Configured network infrastructure on a project basis including firewalls, switches, wireless access points, NVR/DVR, PCI systems, and associated virtual networks
- Administered public and private DNS across multi-tenant client environments

Florida Atlantic University, Boca Raton, FL
SA Systems Technician July 2023 – April 2024
- Managerial role classified under FAU's Administrative, Managerial and Professional (AMP) positions
- Conduct migrations/upgrades regularly on FAU campus' servers and software impacting over 50,000+ users
- Staging/configuring windows VMs and desktops on a departmental basis
- Code & regulate FAU university's sites using PHP/MySQL/HTML
- Manage FAU information technology infrastructure and applications for all three FAU campuses
- Manage data security for FAU health/medical information in accordance with HIPPA compliance standards

Florida Atlantic University, Boca Raton, FL August 2022 – July 2023
System Administrator
- Staging/configuring windows VMs and desktops on a department basis
- Code/regulate the SSERCA website, and Research Computing sites using Linux/HTML
- Work to develop Single-Sign-On tools to allow for improved integration between Research Computing sites
- Manage HPC cluster and service request tickets
- Update SSERCA site and FAU Research Computing mailing lists as needed

ITsavvy, Hauppauge, NY
Network Operations Center Intern May 2022 - July 2022
- Assisted IT clientele with service requests using the Autotask, Datto, and FortiLAN systems
- Built/Coded Raspberry Pi devices for clients
- Dismantled and reinstalled network servers
- Troubleshot client computer service requests through TeamViewer/OpenSSH application

Magnetic Charging, East Islip, NY
Founder of Drop-Shipping Business September 2020 - December 2021
- Built and launched an e-commerce self-hosted web application with integrated storefront, checkout, and supplier fulfillment
- Ran paid social advertising campaigns across Facebook and Instagram, managing targeting, creative, and conversion tracking
- Implemented multi-currency checkout for international orders and established an end-to-end drop-shipping inventory pipeline

OTHER ----------

Technical Skills
- Cloud and hybrid architecture across public cloud, private datacenter, and virtualization platforms
- DevOps and automation engineering: containerization, infrastructure as code, configuration management, and observability
- Security engineering: identity and access management, DevSecOps, incident response, and digital forensics
- Enterprise networking: routing, segmentation, VPN, SD-WAN, firewalling, and high-availability design
- Full stack development, application load balancing, and relational database management
- Endpoint and identity administration across Windows, macOS, and Linux fleets with scripting in PowerShell, Bash, and Python

Soft Skills
- Strong interpersonal skills and knowledge of workplace etiquette
- High EQ employee who works to get the best out of the team
- Can operate on an individual basis as well as in a group setting
- Concise, thorough writer for incident reports, runbooks, and executive communications
- Trusted client-facing advisor who distills complex technical risk into clear business impact and actionable recommendations for executives and stakeholders

INVOLVEMENT ----------

Pi Kappa Alpha Fraternity, Boca Raton, FL January 2022 - January 2023
Scholarship Chair
- Organized the alumni dinners and retreats in which members of the fraternity are awarded scholarships
- Coordinated greek study sessions for members that are at a sub 3.0 GPA
